

Live Exchange of Valves

Simple to use kits for replacement of valves on live gas systems.

M-CEX™

- For use on 1/2" to 2" pipework
- Can be used on both Metallic and PE up to 75mbarg
- Varying sizes of rigid and flexible stoppers
- Adaptors allow use on range of pipe sizes
- One person operation

- Contains adaptors for BSP and BS 746 threads
- Stargland™ technology ensures controlled gas operation
- Designed to pass through varying valve types
- Able to pass around long or short radius bends

- Significantly reduces the duration that the customer is off gas
- Designed for use in restricted locations
- Avoids the need for planned maintenance operations to isolate pipework systems, particularly in multi-occupancy or high rise buildings

Replace leaking valves under live gas

Various pipe sizes and valve types

Reduced gas off time for customer

Comprehensive training and support available
