

# WEXTECH M-LTE

Water Extraction Technology  
Mains - LTE

Simultaneously locate and remove water from live gas mains

- Significantly reduces quantity of excavations required compared to traditional methods.
- Accurately locates the source of ingress to enable permanent repair and avoid repeat visits.
- Can be attached to an Alan Taylor Unit (Bowser) or similar to pump out water quickly and efficiently.
- Compatible with Synthocam 3 live gas CCTV systems used by all UK gas networks, keeping investment cost to a minimum.
- Compact design for easy transportation.

Choice of recordable or non-recordable display units.

The WExTech mains coil

Suction point

Cameras:

S490  
(49mm self levelling)

S340  
(34mm self levelling)

S240  
(24mm)

- **SAFER** - Allows for compliance of COVID-19 social distancing measures.
- **CHEAPER** - Reduces excavations and repeat visits.
- **FASTER** - Speeds up finding the water and removing it.
- **EASIER** - Compact design enables 1 man lift.

- Choice of display with up to 5 hour battery life and a selection of data storage systems options.
- Suitable for use on 'live gas' metallic mains 4" to 10" diameter, and PE mains 90mm to 250mm diameter.
- Can survey up to 100m from a single excavation.
- For use on low pressure up to 75mbarg.
