

The StarGLAND system is a versatile, safe and efficient “live access tool” that enables tracing of PE and PVC gas and water pipework systems.

The system allows for safe insertion of tracing wires into live systems, enabling accurate location of pipework with no interruption to service for consumers, and none of the associated costs.

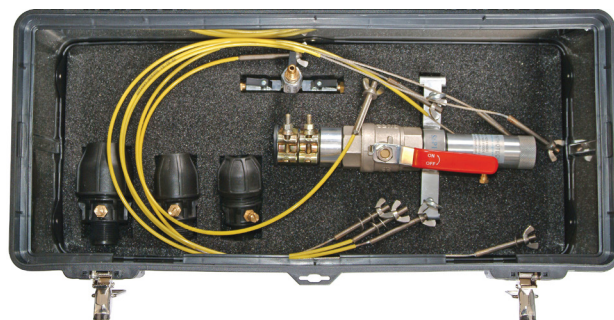

Compatible with:

- Multiple Types of Emergency Control Valve (ECV)
- Wall house entry tees up to 32mm diameter
- Directly onto 16mm, 20mm, 25mm, and 32mm diameter PE pipes
- PE Top Tapping Tees

- No need to shut off gas or water for tracing of pipework
- Reduces Excavation, reinstatement and associated activities
- Allows for straightforward tracing of pipework
- Significantly reduces operational costs
- Enables under pressure access through a variety of entry points
- Suitable for use in low pressure (75mbar), Medium pressure UK (2bar) and Medium Pressure overseas (5.5bar) networks
- In use by all UK Gas Distribution Networks
- Compatible with 20m and 50m CScope tracing wires, and pushrod systems with sondes
